7. Use will begin about January 1st Month				
8. Description of proposed works. (Under the pro-	ovisions of NRS 53.	5.010 you may be	required to subm	it plans and
specifications of your diversion or storage wor	ks.) It is pi	roposed to dri	ll, case, de	velop
and equip an irrigation well for State manner in which water is to be diverted, whether	r by dam of other works,	whether through pipes, (utches, numes, or other	Section conduits.
				1

This permit is issued subject to all existing rights on the source and is limited to what the well will produce but not to exceed 2.6 c.f.s. It is understood that the amount of water herein granted is only a temporary allowance and that the final water right obtained under this permit will be dependent upon the amount of water actually placed to beneficial use. It is also understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to any other ground water development in the area. A bubstantial weir or other type of measuring device must be installed and measurements of water use kept. The well shall be equipped with a 2-inch opening and an air line for measuring depth to water. If well is flowing, a valve must be installed and maintained to prevent waste. The State retains the right to regulate the use of the water
